PROFESSIONAL SUMMARY

Computer Engineering student specialising in Cloud Systems, and 1st Runner-Up in the LTA Singapore BusTech Grand Challenge 2026, leading networking and system integration. Hands-on with Windows Server, Cisco networking and a self-hosted Proxmox lab; studying for AWS SAA-C03, RHCSA and CCNA. Seeking an infrastructure, SRE, cloud or cybersecurity internship from 15 Mar to 13 Aug 2027.

EDUCATION

Singapore Polytechnic, Singapore *April 2025 – April 2028 (expected)*

Diploma in Computer Engineering — Specialisation in Cloud Systems

- **Relevant coursework:** Cloud Foundations, Linux Essentials, Computer Networking, LAN Switching & Wireless, Server Management, ML/AI with Python

Guarantee International College, Yangon, Myanmar *July 2023 – November 2024*

Cambridge IGCSE

- **Grades:** 4 A* & 1 A — Computer Science (A*), ICT (A*), Mathematics (A*), Physics (A*), Additional Mathematics (A)

PROJECTS

BusGuard (Hackathon) — *LTA Singapore BusTech Grand Challenge 2026 · 1st Runner-Up* *June – October 2026*

- Led networking and integration in a team of five, linking camera AI, a passenger app and a 3D digital twin, with fail-safes for frozen video and duplicate messages.
- **Impact:** Lets remote operators assist passengers with special needs on autonomous vehicles, with no staff on board.
- **Tech stack:** MQTT, RTSP, Bosch IP camera, offline private network

Windows Server Domain (School Project) — *Server Management · Team of four* *July 2026*

- Built the file and web server, with RAID-5, secured department shares, GPO drive maps and HTTPS sites.
- Traced HTTPS certificate errors to missing SAN entries and fixed them by reissuing certificates via certreq.
- **Impact:** Provides secure, centralised file storage with quota control and remote file sync for a simulated company.
- **Tech stack:** Windows Server 2025, AD DS, AD CS, IIS, FSRM, Group Policy, PowerShell, VMware

Multi-Site Company Network (School Project) — *Computer Networking · Individual work* *August 2026*

- Designed a 7-router, multi-area OSPF network from a single /24, with a backup border router, HSRP failover and an extended-ACL firewall.
- **High availability:** Keeps every office online if the main border router fails, with 0% packet loss in failover testing and room for 100% growth.
- **Tech stack:** Cisco IOS, OSPF, HSRP, extended ACLs, VLSM, Packet Tracer

Proxmox Homelab (Side Project) *Ongoing*

- Self-hosted Proxmox VE 9.2 on a mini PC (64 GB RAM), with Tailscale remote access, no open ports and an isolated Parrot Security VM.
- Wrote a Bash script to automate VM backups and system updates, scheduled with cron.
- **Impact:** Provides an always-on lab to practise Linux and penetration testing safely from anywhere.
- **Tech stack:** Proxmox VE, LXC, Linux, Tailscale, cron

AWS VPC Web Server (Side Project) *In Progress*

- Building a custom VPC with EC2 and S3 access through IAM roles while studying for SAA-C03.
- **Tech stack:** AWS VPC, EC2, S3, IAM

CERTIFICATIONS & COURSES

- Introduction to Networking — NVIDIA (Oct 2026)
- AI for Essential Digital Skills — AI Singapore (Sep 2026)
- Introduction to Cybersecurity — Cisco Networking Academy (Sep 2026)
- Red Hat System Administration I (RH124) — Red Hat (Aug 2026)
- Currently preparing for CCNA (target: Jan 2027), RHCSA (target: Feb 2027) and AWS SAA-C03 (target: Mar 2027)

TECHNICAL SKILLS

Cloud (AWS): IAM, EC2, S3, VPC, Route 53 (studying towards SAA-C03)
Virtualisation: Proxmox VE, LXC, VMware
Linux: RHEL, Bash scripting, SSH & key authentication, systemd
Windows: Windows Server, Active Directory, Group Policy, PowerShell, IIS, AD CS (PKI), FSRM, RAID
Networking: TCP/IP, VLSM subnetting, OSPF, HSRP, ACLs, VLANs, DNS / DHCP, Cisco IOS, Tailscale
Tools & languages: Python, C++, Git, Cisco Packet Tracer, MQTT, RTSP

VOLUNTEERING

KSUG.AI — KubeSmart & AI User Group — *Community Volunteer & Event Assistant* *Dec 2025 – Mar 2026*

- Created LinkedIn event posts and helped run on-site meetups on AI and cloud-native topics.
